## Email Reply Example

Order Overdue

Transaction {{ name }} has exceeded Due Date. Please take necessary action.

Details

- Customer: {{ customer }}
- Amount: {{ grand\_total }}

## How to get fieldnames

The fieldnames you can use in your email template are the fields in the document from which you are sending the email. You can find out the fields of any documents via Setup > Customize Form View and selecting the document type (e.g. Sales Invoice)

## Templating

Templates are compiled using the Jinja Templating Language. To learn more about Jinja, read this [documentation](#).
